GitHub Teamwork

Basics

Cheat List

1. Create Organisation
2. Create project repo
3. All team members clone the repo in their local machine
4. One of the team members initialise the project - create the index.php file
5. Create branch
6. Publish the branch
7. Work in your branch - preferably not on the same files!!! not to envoke conflicts
8. Commit changes
9. Push
10. Create pull request
11. Merge if no conflicts are present.
12. If there are any conflicts - resolve them. Then Merge.
13. Delete the branch - online and on your local machine.
14. UPDATE THE MASTER/MAIN/ BRANCH ON YOUR LOCAL MACHINE - FETCH ORIGIN
15. Create new branch ….

Branches additional options
